

Only athletes who are currently registered on the Athletics New Zealand Membership database will be ranked

Before an athlete can be entered on the ranking lists a membership id must be obtained from the Athletics New Zealand online database as well as confirmation of current membership. Centre registrars are responsible for entering the membership of athletes in their region on the database and for keeping details of membership up to date. Please note that a membership id is not the same as an athlete's registration number. While a registration number identifies an athlete as being registered for the year, it is not until this number as well as the other membership details are added to the database that this information becomes available to the ranking lists statistician. The statistician is only able to act on membership already processed on the database.

Failure to automatically include a registered athlete's performance on the ranking lists usually indicates that the athlete's membership details have not been recorded online. This can be caused by bottlenecks in processing membership on the database at centre level or by club registrars who have not yet sent their latest membership details to the centre registrar.

If you are a currently registered athlete with a valid performance not included on the ranking lists, please email the appropriate centre registrar to confirm that your membership has been entered on the database and then send that confirmation along with the performance details to:
